Company Experience and Projects

Executive Director, Ismajl Baftijari, established Institute of Science and Technology "INSI" in 2010 to provide professional services in spatial planning, such as Municipal Development Plans, Municipal Zoning Maps or Detailed Regulatory Plans, Strategic Environmental Assessments (SEA), Environmental Impact Assessment (EIA) and Public-Private Partnership (PPP) feasibility studies.

Over the past 12 years, INSI has expanded its services and now employs 33 experts that specialise in various research studies related to economic development, transport, public mobility, technical and social infrastructure, housing, demography, global campaigns, smart components, as well as legal services, capacity building, and software or website developments.

INSI is now composed of diverse professionals with long working experience who specialize in assessments of and solutions for energy efficiency, engineering, architecture, spatial planning, economy, technical, transport, public, and social infrastructure, environment, natural disasters, cultural heritage, settlements, housing, and land use.
