Company Experience and Projects

Trankos, a language services provider founded in 2004 in Kosovo, offers technical translation, high-level physical and virtual interpreting, and training and serves as a resource center in the language sector in Kosovo.

Tankos translate between 2-4 million words annually, covering topics from Aviation for the Civil Aviation Authority of Kosovo to Banking to Waste Management with JICA (Japan). The latest tools in the translation industry, such as the RWS Trados GroupShare 2020 and Studio Professional, allow us to deal with the most demanding translation requests.

Trankos is the main LSP providing language services to the Council of Europe office in Kosovo, Belgrade, and Tirana as well as the European Union Office in Kosovo.

Trankos also has provided similar services to the US Embassy in Kosovo as well as several USAID-backed projects such as TEAM, ATK, TLP-SP, and Chemonics.

Currently, Trankos are seeking new avenues of work with LSP with whom they plan to work on future activities that require data handling (labelling, annotations, etc.) for processes such as Neural Machine Translation, NLP, text-to-speech, etc. in which we can contribute especially for Albanian and Serbian languages.
