Company Experience and Projects

AKG, is a full service, engineering, surveying, consulting, geological, design and mapping service to public and private sector clients. Established in 2018 and located in Pristina Kosovo AKG is a market leader in the geodesy industry with complex geodetic calculations. We provide information about all the major topics in business such as mapping, geology, geodesy, surveying cartography, EIA (Environment Impact Assessment) GIS, drone data and satellite data. We use the latest computer software to produce professional, detailed, and accurate final product.
